Data Analyst | Business Analytics | SQL • Python • Power BI

EDUCATION

MTECH | Data Analytics

The George Washington University

August 2025 – Present

Washington DC, USA

BTECH | Computer Science and Engineering

KIIT University

Sept 2021 – Jun 2025

Bhubaneswar, India

EXPERIENCE

Clinion

Business Development Analyst Intern

June 2024 – June 2025

Hyderabad, India

- Researched 15+ potential clients and 5 industry trends to support strategic planning.
- Assisted in preparing 10+ client proposals and presentations, securing 3 new partnerships during the internship.
- Analyzed sales metrics, improving reporting accuracy by 20% and providing actionable insights.

IoT Lab, BITS-Pilani, Pilani Campus

Research Intern

May 2023 – Dec 2023

Pilani, India

- Conducted and analyzed over 10 technical papers on IoT and Digital Twin frameworks, gaining expertise in sensor integration, real-time data analytics, and virtual modeling.
- Proposed 3+ innovative ideas leveraging predictive analytics and cyber-physical systems, contributing to a 5-member research team; recognized by the mentor for leadership and adaptability.
- Published a research paper titled "Digital Twins in Smart Manufacturing: Applications, Navigating Challenges, Technologies, and Future Directions for the Industry."

SELECTED PROJECTS

Adverse Drug Reaction (ADR) Prediction System

- Built an AI-powered ADR prediction system using a Relational Graph Convolutional Network (RGCN) in PyTorch, modeling drug–indication–side effect relationships as a graph to generate probability and confidence scores.
- Benchmarked performance against a stacking ensemble (XGBoost, LightGBM, CatBoost + Random Forest meta-model), achieving Precision $\approx 91\%$, Recall $\approx 82\%$, and F1 $\approx 86\%$ on the experimental baseline.
- Processed and merged 500K+ records from multiple drug, indication, and side-effect datasets, and deployed an interactive Streamlit dashboard with probability/confidence visualizations and CSV export.

Multilingual Video Summarizer using Large Language Model (LLM)

- Developed a multilingual video summarizer using Ollama (Llama 3), Python libraries, LangChain, tiktoken, Deep Translator, and Google API for translation.
- Achieved a BLEU of 89.6%, ROUGE-L of 88.5%, and Readability Index of 72.5%, with a Translation Time of 3.5 seconds per 1,000 tokens, and an Avg Processing Time of 55 seconds per 10-minute video.
- Pioneered the inclusion of Amharic, Afan Oromo, and 20+ African languages, marking the first-ever integration of these languages into the model.

Real-Time Traffic Noise Monitoring & Analysis

- Built a real-time data pipeline using Python, Apache Spark, and SQL to process streaming IoT noise data, identifying high-risk zones using aggregation and spatial analysis.
- Developed a Random Forest model achieving 95.4% accuracy ($R^2 \approx 0.87$) for noise prediction.

KEY SKILLS

- **Programming & Data:** Python (Pandas, NumPy), SQL
- **Data Analysis:** Data Cleaning, EDA, Statistical Analysis, Feature Engineering
- **Visualization:** Power BI, Matplotlib, Seaborn, Streamlit
- **Tools & Platforms:** Excel, Git, Jupyter Notebook, PostgreSQL
- **Machine Learning:** Regression, Classification, Random Forest, Graph Neural Networks (RGCN), Model Evaluation
- **AI & Automation:** LLMs (OpenAI, Llama), LangChain, AI Agents, Prompt Engineering, Workflow Automation

SELECTED HONOURS / AWARDS

- Ranked in the top 5% in Ethiopia's SSLE entrance examination among 400,000 students (2021).
- Awarded the highly competitive SII Scholarship by the Indian Government to study BTech in India (2021).
- Awarded Best Project in the FTL Global program for UNDP's Sustainable Development Goals (SDGs) (2024).
